01 Start here

This is the working sales guide for one Azul representative who finds prospects, runs discovery, demonstrates the offer, closes the agreement, and coordinates delivery. Focus on South Florida roofing, HVAC, and other home-service businesses. Use English or Spanish according to the buyer's preference.

The first objective is a useful conversation with an owner. The second is an agreed business problem. Recommend a website or an AI workflow only when it fits that problem. Finish every productive conversation with a specific action, an owner, and a date.

Confirmed starting prices

- **Website Build:** $1,500 one-time build plus $50/month for hosting and ongoing support. The current site describes 8-15 pages, custom design, a content management system, SEO setup, and English and Spanish versions. Confirm the project scope in writing.
- **Custom AI Agent:** starts at $2,000 setup plus $300/month. This is an entry point, not a fixed price for every workflow. Voice, integrations, usage, and more complex work require a scoped quote.
- **Combined purchase:** quote each service and its recurring fees separately. No $3,500 package is authorized in this playbook.

Find the right page

- Targeting and outreach plan: pages 2-3.
- Cold calls, DMs, and email: pages 4-8.
- Discovery, website demos, and AI demos: pages 9-12.
- Value, pricing, and closing: pages 13-15.
- Objections and proposals: pages 16-18.
- Follow-up and pipeline: pages 19-20.
- Delivery, practice, and launch settings: pages 21-23.

Use the scripts naturally

Replace every bracketed field before use. Each observation must come from something the rep actually checked. Read the buyer's response before choosing the next question. For Spanish, start with **usted** and use natural South Florida phrasing. Operational guidance is in English; customer-facing scripts appear in both languages.

Version 1 | October 25 2026 | Internal sales use

02 Choose prospects and the right offer

Spend the first two weeks mainly on roofing and HVAC. Add plumbers, pool companies, landscapers, and other local services once the rep can explain the offer clearly. For an unfamiliar industry, verify the workflow with the founder before promising an agent.

Research signals

Website opportunity: the business has an active Google profile or social presence, but no website, a broken site, an unclear mobile experience, missing service information, or a difficult path to an estimate. Confirm the problem on an actual device. An unattractive design alone does not prove lost business.

AI opportunity: the owner describes unanswered inquiries, slow follow-up, repeated questions, scheduling work, or manual copying between tools. Public business hours and a contact form are conversation starters; they do not prove missed leads.

Combined opportunity: both problems are confirmed and the team can support delivery. Ask which problem matters first. Phase the work if doing both would make the project harder to approve or launch.

Prioritize with a simple score

Give one point for each condition: active local business, accessible owner, observed website issue or confirmed workflow problem, ability to take more work, and an agreed reason to act. Use 4-5 points for immediate attention, 2-3 for research or nurture, and 0-1 for low priority. This is a sorting aid, not a prediction of purchase.

Questions that change the recommendation

EN: "Are you trying to get more people to contact you, or handle the people who already do?" "If more inquiries came in next week, could your team handle them?"

ES: "¿Busca que más personas lo contacten, o atender mejor las consultas que ya recibe?" "Si la próxima semana llegaran más consultas, ¿su equipo podría atenderlas?"

Park a deal when

- The owner cannot name a meaningful problem or is at capacity with no growth priority.
- The desired result requires traffic or advertising the website project does not include.
- The AI request has no repeatable task, no access to required tools, or no person for exceptions.
- The buyer needs a custom feature or deadline that delivery has not confirmed.

Record the reason. A sensible next step can be a later conversation or a referral.

03 Research and contact plan

Five minute preparation

[ ] Confirm the business name, trade, service area, owner or decision contact, and public business contact details.

[ ] Open the site on mobile. Check the main action, services, contact details, language options, and estimate form without submitting a fake inquiry.

[ ] Write one factual observation and one question. Example: "I couldn't find an estimate form on the mobile homepage. How do customers usually request one?"

[ ] Choose the website or AI opening. Have the relevant portfolio or working demo ready.

[ ] Check prior contacts, language, last outcome, and any request to stop outreach.

Suggested cold outreach sequence

Use one record per business across all channels. The following is a starting experiment, not a required volume or conversion benchmark.

- **Day 1:** one manual call. If unanswered, a short voicemail and one relevant email, if a suitable business address is available.
- **Day 3:** one personal DM to the business account if it is active. Skip it if already in a conversation elsewhere.
- **Day 6:** a second call at a different suitable business time. Reference the original topic.
- **Day 10:** one email with a useful observation or a permission-based demo offer.
- **Day 15:** a final email or DM on the channel used before. Close the sequence if there is no reply.

Stop the sequence when the person responds, books, declines, or requests no further contact. Use the follow-up plan on page 19 for an active opportunity. Avoid repeating every touch across every channel.

Practical contact rules

Use manual calls and personal messages for this playbook. Identify Azul, use accurate subjects, and respect channel rules and contact preferences. Use a maintained business mailing address and an easy opt-out in commercial emails. Keep a shared do-not-contact list. Do not treat a public phone number as permission for AI calls, automated texts, or a prospect-specific agent deployment.

Opening approach

Lead with the business and the observation. Explain AI only after confirming a task it could help with. Do not claim that the owner is losing money, that the site is broken, or that Azul already works with a competitor unless verified.

04 Website cold call

Goal: earn a short discovery meeting. If the owner has time and interest now, continue to page 9.

English

Open: "Hi, is this [Name]? This is [Rep] with Azul here in South Florida. We build websites for local service businesses in English and Spanish. I was looking at [Business] and noticed [specific observation]. Can I take 30 seconds to explain why I called?"

Explore: "How do most customers request an estimate today?" Pause. "Does that process work well for you, or is there something you'd change?"

If there is a problem: "We could look at a clearer way for customers to [desired action]. I can show you relevant website work and walk through your current site. Would [Tuesday at 10] or [Wednesday at 2] work for a 15-minute call?"

If they ask price: "The standard website build is $1,500, plus $50 a month for hosting and ongoing support. Custom features are quoted separately. Would that be a workable range if the scope fits?"

Español

Inicio: "Hola, ¿hablo con [Nombre]? Soy [Rep], de Azul, aquí en el sur de Florida. Creamos sitios web en inglés y español para negocios de servicios. Estaba revisando [Negocio] y noté [observación concreta]. ¿Me permite 30 segundos para explicarle por qué llamo?"

Explorar: "¿Cómo le piden un estimado sus clientes hoy?" Espere. "¿Ese proceso le funciona bien, o hay algo que le gustaría mejorar?"

Si hay un problema: "Podemos revisar cómo facilitar que sus clientes [acción deseada]. Le muestro trabajos relevantes y vemos su sitio actual. ¿Le conviene [martes a las 10] o [miércoles a las 2] para una llamada de 15 minutos?"

Precio: "El sitio estándar cuesta $1,500 de pago único, más $50 al mes de hosting y soporte continuo. Las funciones especiales se cotizan aparte. Si el alcance encaja, ¿ese rango sería viable para usted?"

Common branches

Busy EN / ES: "Of course. Is there a better business time to call?" / "Claro. ¿En qué horario le conviene que lo llame?"

Gatekeeper EN / ES: "Who handles the website and new-customer inquiries? This is about a website project from Azul." / "¿Quién se encarga del sitio web y las consultas de clientes nuevos? Llamo de Azul por un proyecto web."

Voicemail EN / ES: "Hi [Name], [Rep] at Azul. I had a question about how customers request estimates on your site. My number is [number]." / "Hola [Nombre], soy [Rep], de Azul. Quería preguntarle cómo sus clientes piden estimados por su sitio. Mi número es [número]."

05 AI agent cold call

Goal: discover a repeatable problem. Start with the owner's process. The $300/month starting tier is not a universal voice or integration package.

English

Open: "Hi [Name], this is [Rep] with Azul in South Florida. We build bilingual AI assistants for specific business tasks. Quick question: when someone contacts [Business] while the team is busy, what happens next?"

Explore: "Who responds?" "How long does that usually take?" "Is that something you'd like to improve, or is it handled well already?"

If the problem is real: "An assistant may be able to handle [confirmed task] and send exceptions to your team. We'd need to check your tools and test the workflow first. Would a 20-minute call to map that out be useful?"

If they ask price: "Custom agents start at $2,000 setup and $300 a month. The channel, integrations, and usage affect the quote. I'd want to understand the task before telling you which price applies."

Español

Inicio: "Hola [Nombre], soy [Rep], de Azul, aquí en el sur de Florida. Creamos asistentes de AI bilingües para tareas específicas del negocio. Una pregunta rápida: cuando alguien contacta a [Negocio] y el equipo está ocupado, ¿qué pasa después?"

Explorar: "¿Quién responde?" "¿Cuánto tiempo suele pasar?" "¿Le gustaría mejorar esa parte, o ya la tienen bien resuelta?"

Si hay un problema: "Un asistente podría encargarse de [tarea confirmada] y pasar los casos especiales a su equipo. Primero revisaríamos sus herramientas y probaríamos el proceso. ¿Le serviría una llamada de 20 minutos para verlo juntos?"

Precio: "Los agentes a la medida empiezan en $2,000 de configuración y $300 al mes. El canal, las integraciones y el uso cambian la cotización. Primero necesito entender la tarea para decirle qué precio corresponde."

Route the response

- **Already has staff:** ask which repetitive task the staff would like taken off their plate. Do not promise to replace a person.
- **Few inquiries:** explore administrative work only if the owner names a worthwhile problem. Low volume may make an agent a poor investment.
- **Wants phone callbacks:** distinguish this from web chat or text. AI Lead Agent is described in the current source as an HVAC pilot, with roofing next. Confirm current delivery availability with the founder.
- **No interest:** "Understood. I'll close this out. Thank you." / "Entendido. Cierro el seguimiento. Gracias."

06 Social direct messages

Send from a complete business profile with a link to Azul. Use one real observation. Ask before sending a video or a large attachment. A public post is a conversation reference, not evidence of business performance.

Website first message

EN: "Hi [Name], [Rep] from Azul in South Florida. I saw your [specific project/post] and checked the website. I noticed [verified detail about the mobile contact path]. How do you prefer customers to request an estimate?"

ES: "Hola [Nombre], soy [Rep], de Azul, aquí en el sur de Florida. Vi su [proyecto/publicación concreta] y revisé el sitio. Noté [detalle verificado sobre cómo contactarlos desde el celular]. ¿Cómo prefiere que los clientes le pidan un estimado?"

AI first message

EN: "Hi [Name], [Rep] from Azul. Quick question about [Business]: who handles new inquiries when the team is on a job? We build bilingual assistants for tasks like answering approved questions and collecting customer details. Is that a process you're looking to improve?"

ES: "Hola [Nombre], soy [Rep], de Azul. Una pregunta sobre [Negocio]: ¿quién atiende las consultas nuevas cuando el equipo está trabajando? Creamos asistentes bilingües para responder preguntas aprobadas y recopilar datos de clientes. ¿Es un proceso que le gustaría mejorar?"

When they respond

EN: "Thanks. What part is most difficult right now?" After the answer: "I can show you [a relevant website example / a short working demo]. Would you prefer a short video here or a call at [two times]?"

ES: "Gracias. ¿Qué parte se le hace más difícil ahora?" Después: "Le puedo mostrar [un sitio parecido / una demostración breve que funciona]. ¿Prefiere un video corto por aquí o una llamada en [dos horarios]?"

No reply follow up

EN: "One specific idea for [Business]: [useful, verified suggestion]. If this is a priority, I can show you what I mean."

ES: "Una idea concreta para [Negocio]: [sugerencia útil y verificada]. Si esto es una prioridad, le puedo mostrar a qué me refiero."

Final message

EN: "I'll close the loop here. If improving [specific process] becomes a priority later, you're welcome to reach out."

ES: "Cierro el seguimiento por aquí. Si más adelante quiere mejorar [proceso concreto], con gusto lo conversamos."

Use these within the contact plan on page 3. An objection is an answer; respond to it instead of continuing a scheduled sequence.

07 Website cold email

Keep the first email short and plain. Include only a detail you personally verified. Do not imply that you already built a redesign or audit unless it exists.

English first email

Subject: A question about estimate requests at [Business]

Hi [Name],

I was looking at [Business]'s website and noticed [specific, factual observation]. How do customers usually request an estimate from their phone?

I'm [Rep] with Azul in South Florida. We build websites in English and Spanish, with clear service information and an easy path to contact the business.

Would it be useful if I sent one relevant example and a couple of ideas for your site?

[Rep] | Azul | [business phone] | azulwebdev.com

[Current business mailing address]

If you'd prefer no further emails, reply and I'll stop.

Español primer correo

Asunto: Una pregunta sobre los estimados de [Negocio]

Hola [Nombre],

Estaba revisando el sitio de [Negocio] y noté [observación concreta y verificada]. ¿Cómo suelen pedirle un estimado los clientes desde su celular?

Soy [Rep], de Azul, aquí en el sur de Florida. Creamos sitios en inglés y español con información clara de los servicios y una forma sencilla de contactar al negocio.

¿Le serviría que le enviara un ejemplo relevante y un par de ideas para su sitio?

[Rep] | Azul | [teléfono del negocio] | azulwebdev.com

[Dirección postal actual de Azul]

Si prefiere no recibir más correos, dígamelo y dejo de escribirle.

Follow up with something useful

EN: "Hi [Name], one idea for your site is [specific improvement]. Here is a relevant example of our website work: [verified portfolio link]. Would you like to review your estimate-request process together for 15 minutes?"

ES: "Hola [Nombre], una idea para su sitio es [mejora concreta]. Aquí tiene un ejemplo relevante de nuestro trabajo web: [enlace verificado del portafolio]. ¿Le gustaría revisar juntos durante 15 minutos cómo recibe las solicitudes de estimado?"

Use the same signature and opt-out on follow-ups. A reply asking for pricing gets a direct answer from page 4, followed by one scope question.

08 AI agent cold email

Ask about the process rather than assuming missed calls or lost sales. Only link to a working demo you have personally tested.

English first email

Subject: Who handles new inquiries at [Business]?

Hi [Name],

When a new customer contacts [Business] while your team is busy, who handles the first response?

I'm [Rep] with Azul in South Florida. We build bilingual AI assistants for specific jobs, such as answering approved questions, collecting lead details, or helping with scheduling when the tools support it.

Is there a repetitive part of that process you'd like to take off your team's plate?

[Rep] | Azul | [business phone] | azulwebdev.com

[Current business mailing address]

If you'd prefer no further emails, reply and I'll stop.

Español primer correo

Asunto: ¿Quién atiende las consultas nuevas en [Negocio]?

Hola [Nombre],

Cuando un cliente nuevo contacta a [Negocio] y su equipo está ocupado, ¿quién da la primera respuesta?

Soy [Rep], de Azul, aquí en el sur de Florida. Creamos asistentes de AI bilingües para tareas concretas, como responder preguntas aprobadas, recopilar datos o ayudar a agendar cuando las herramientas lo permiten.

¿Hay alguna parte repetitiva de ese proceso que le gustaría quitarle de encima a su equipo?

[Rep] | Azul | [teléfono del negocio] | azulwebdev.com

[Dirección postal actual de Azul]

Si prefiere no recibir más correos, dígamelo y dejo de escribirle.

Follow up after no reply

EN: "Hi [Name], one way to explore this would be to map a single task, such as [relevant task], and check where a person needs to step in. Would a brief conversation about your current process be useful?"

ES: "Hola [Nombre], podemos empezar por una sola tarea, como [tarea relevante], y revisar cuándo debe intervenir una persona. ¿Le serviría una conversación breve sobre el proceso que usa hoy?"

When they request a demo

EN: "Happy to. Which task would you want to see, and what software do you use for it today? I'll confirm what we can demonstrate before we meet."

ES: "Con gusto. ¿Qué tarea le gustaría ver y qué programa utiliza hoy para hacerla? Le confirmo qué podemos demostrar antes de reunirnos."

09 Run the discovery call

Suggested length: 20-25 minutes. Spend the first half learning, then show only relevant work. Offer English or Spanish. Take notes in the buyer's words.

Set the agenda

EN: "Let's understand how you handle [topic], look at one relevant example, and see whether a project makes sense. If it does, we'll agree on the scope and next step. What would make this call useful for you?"

ES: "Primero vemos cómo maneja [tema], después le muestro un ejemplo relevante y revisamos si tiene sentido hacer un proyecto. Si encaja, acordamos el alcance y el siguiente paso. ¿Qué le gustaría resolver en esta llamada?"

Ask these questions in order

1. **EN:** "Where do new customers come from today, and what happens after they contact you?" **ES:** "¿De dónde llegan sus clientes nuevos y qué pasa después de que lo contactan?"
2. **EN:** "Which part causes the most trouble? Can you walk me through the last time it happened?" **ES:** "¿Qué parte le causa más problemas? ¿Me cuenta la última vez que pasó?"
3. **EN:** "How often does it happen? What does it cost you in time, rework, or missed opportunities?" **ES:** "¿Con qué frecuencia pasa? ¿Qué le cuesta en tiempo, trabajo repetido u oportunidades?"
4. **EN:** "What have you tried, and what would you want done differently?" **ES:** "¿Qué ha intentado y qué le gustaría que fuera diferente?"
5. **EN:** "If we improve this, what would you want to see or measure?" **ES:** "Si mejoramos esto, ¿qué resultado le gustaría ver o medir?"
6. **EN:** "What timing and investment would be workable? Who else needs to review the decision?" **ES:** "¿Qué fecha y presupuesto serían viables? ¿Quién más necesita revisar la decisión?"

Confirm before demonstrating

EN: "What I'm hearing is [problem], which affects [consequence]. You want [outcome] by [timing]. Is that accurate?"

ES: "Por lo que me cuenta, [problema] afecta [consecuencia]. Quiere lograr [resultado] para [fecha]. ¿Lo entendí bien?"

Proceed when there is a concrete problem, an owner for the decision, a plausible budget, and a feasible next step. If a fact is unknown, write it down and assign a follow-up. A polite conversation alone is not a qualified deal.

10 Website discovery and demonstration

Confirm the website scope

Ask which services and areas need pages; what action visitors should take; who supplies logos, photos, and content; whether English and Spanish are needed; who controls the domain; and whether the buyer expects forms, online payment, a store, logins, or integrations.

The current standard offer describes 8-15 pages. Confirm the exact page list and what support covers. E-commerce, client portals, logins, integrations, and other custom functions need a separate quote. SEO setup is not an ongoing ranking or lead-generation commitment.

Five minute demonstration

1. Open the prospect's actual site on mobile. Ask permission to discuss the observed issue. Show it accurately without exaggerating its effect.
2. Open a relevant example from Azul's current work page. For roofing, Aspire is the closest listed example. Explain the visible work you can verify.
3. Follow the visitor's path: service information, trust information, and the action to request an estimate. Do not submit live test leads to a client business.
4. Switch languages if applicable. Explain what the proposed scope would include.
5. Ask the buyer to assess the change. Then confirm scope and price.

What to say

EN: "You mentioned customers need a clearer way to [action]. Here is how that path is organized in this example. For your site, we'd confirm [pages and features]. Which part would help most, and what is missing?"

ES: "Me comentó que sus clientes necesitan una forma más clara de [acción]. Así está organizado ese recorrido en este ejemplo. Para su sitio, confirmaríamos [páginas y funciones]. ¿Qué parte le ayudaría más y qué falta?"

If they ask about results

EN: "I can show you the website work. I don't have verified results showing how much revenue this would produce for your business. We can define what to track after launch."

ES: "Le puedo mostrar el trabajo web. No tengo resultados verificados que indiquen cuántos ingresos produciría para su negocio. Podemos definir qué medir después del lanzamiento."

Keep free work bounded

If a mockup would help a qualified buyer, propose one representative screen only after confirming the founder's capacity. Label it a concept. Agree on a review meeting before preparing it. A full custom site should follow an approved agreement and payment schedule.

11 AI discovery and feasibility

An AI project needs one defined job, known inputs, a clear output, and someone who owns the exceptions. Verify the tools and workflow with the founder before quoting capability or delivery dates.

Questions to map the task

- **EN:** "Which one task should it handle first?" **ES:** "¿De qué tarea debería encargarse primero?"
- **EN:** "Where does the request arrive, and what information does it need?" **ES:** "¿Por dónde llega la solicitud y qué información necesita?"
- **EN:** "What tools do you use, and who can provide access?" **ES:** "¿Qué herramientas utiliza y quién puede dar acceso?"
- **EN:** "How many requests do you handle, and in which languages and hours?" **ES:** "¿Cuántas solicitudes maneja, en qué idiomas y horarios?"
- **EN:** "When should it ask a person for help?" **ES:** "¿En qué casos debe pedir ayuda a una persona?"
- **EN:** "What would a successful result look like in a real example?" **ES:** "¿Cómo se vería un resultado correcto en un ejemplo real?"

Record before the proposal

[ ] One task and one initial channel, such as website chat. Record additional channels separately.

[ ] Approved answers, required data, supported language, and service-area rules.

[ ] Exact tools and required actions. An integration shown in a sample is not a promise that the client's account supports it.

[ ] Volume, usage estimate, included allowance, and handling of excess usage.

[ ] Human handoff contact, hours, trigger conditions, and fallback if a tool fails.

[ ] Who provides content and access, who reviews tests, and who approves launch.

[ ] Success measures and acceptance examples, including a normal request, an unknown answer, and a request for a person.

Separate the offers clearly

Custom AI Agent starts at $2,000 setup plus $300/month for a scoped entry project. Do not attach voice, outbound calling, unlimited use, or multiple integrations to that starting price without an approved quote.

The site also lists an AI Answering Service at $349/month. That is a separate offer; it does not establish the price or scope of a custom agent. AI Lead Agent is described as an HVAC pilot with roofing next. Verify availability before pitching it as ready to deploy.

Use only sample data in demonstrations. Customer contact, calling permissions, recording behavior, and access controls need confirmation before a real deployment.

12 AI demonstration

Prepare a working example

Choose the task the buyer confirmed. Use clearly fictional names and requests. Before the meeting, test both languages, the connection to the destination tool, and the human handoff. If the demo is a prototype or a recording, say so. A transcript or animation is not proof that a live workflow works.

Six minute demonstration

1. **Recap:** state the current process and the one part the agent would handle.
2. **Normal case:** show an inquiry, the required questions, and the real output. For booking, confirm an appointment exists in the test calendar rather than trusting the chat message alone.
3. **Spanish case:** repeat a short customer request in Spanish and verify the output.
4. **Unknown case:** ask something outside approved answers. Show how it avoids inventing an answer.
5. **Handoff case:** request a person or simulate a tool problem. Show where the owner receives the case.
6. **Review:** ask whether this matches the buyer's workflow and what must change.

Introduce the demo

EN: "You said [task] takes [time or effort]. This example handles [bounded task]. I'm using sample data. The parts we would still need to confirm for your business are [tools, access, usage, and exceptions]."

ES: "Me comentó que [tarea] le toma [tiempo o esfuerzo]. Este ejemplo se encarga de [tarea delimitada]. Estoy usando datos de ejemplo. Para su negocio todavía necesitamos confirmar [herramientas, accesos, uso y excepciones]."

Ask for an assessment

EN: "Would that output be useful to your team? What would stop you from trusting it with this task?"

ES: "¿Ese resultado le serviría a su equipo? ¿Qué tendría que resolver para confiarle esta tarea?"

When it fails

EN: "That step didn't work as intended. I'll record it, confirm the cause with our builder, and show you the corrected result before you decide."

ES: "Ese paso no funcionó como debía. Lo voy a documentar, revisar con quien lo construye y mostrarle el resultado corregido antes de que decida."

Do not improvise a claim that the production system already solves a demo failure. Make the next meeting about the specific open requirement.

13 Explain value and the full cost

Use the buyer's numbers. Label unknowns as assumptions. Revenue, gross profit, and cash saved are different measures. A website does not create traffic by itself, and an agent does not create new demand merely by answering inquiries.

Website example

At the confirmed standard rate, the build plus twelve monthly payments is **$2,100**: $1,500 + (12 x $50). This excludes separately quoted work and any other charges stated in the agreement.

If the buyer earns **$700 in contribution per additional job**, it takes three genuinely incremental jobs to cover $2,100. This is arithmetic with a hypothetical margin, not an expected result. Ask the buyer for a realistic figure after job costs. Never use the full job price as profit.

AI example

At the lowest stated starting rates, setup plus twelve monthly payments is **$5,600**: $2,000 + (12 x $300). The actual quote may be higher. Included usage, extra usage, third-party costs, and scope changes must be explicit.

For a purely illustrative task, 20 hours per month valued at $25/hour equals $500 in monthly capacity. Against a $300 base fee, the difference is $200 before other costs. A $2,000 setup would take ten months to recover at that difference. This assumes the hours are actually recovered and valuable. Time released is not automatically a payroll saving.

Talk through the assumptions

EN: "Let's use your numbers rather than guess. How much time would this realistically free up, or what is the contribution from an extra job? Which assumptions should we test before making a decision?"

ES: "Usemos sus números. ¿Cuánto tiempo podría liberar de verdad, o cuánto le queda de un trabajo adicional después de los costos? ¿Qué supuestos debemos comprobar antes de decidir?"

Show the price without hiding recurring fees

Separate the build or setup fee, monthly fee, included scope, usage allowance, extra usage, and other charges. Explain when each payment begins only after the billing schedule is approved. Calculate comparisons using the actual quoted amount, not the lowest advertised starting point.

If the economics do not make sense, narrow the task, choose the website first, revisit later, or recommend no project. Do not force a return calculation to justify the offer.

14 Close a website project

Before asking for agreement, confirm the page list, content responsibilities, languages, forms, custom requirements, support scope, delivery milestones, and who approves. Explain any exclusions that matter to this buyer.

English

Recommend: "Based on what you described, I'd recommend a website focused on [services] and helping visitors [action]. The agreed scope would be [specific scope]."

Price: "The standard build is $1,500 one time, plus $50 a month for hosting and ongoing support. [Custom requirement] would be quoted separately. We'll put the page list, support scope, billing schedule, and milestones in the agreement."

Check: "Does that address what you wanted to fix? What would you need to feel comfortable moving forward?"

Ask: "If the written scope matches what we discussed, would you like to move forward?"

Next action: "I'll send the scope for review. Let's review any questions at [time and date]. Once the agreement and agreed initial payment are complete, we'll schedule onboarding."

Español

Recomendación: "Por lo que me explicó, le recomiendo un sitio enfocado en [servicios] y en facilitar que sus visitantes [acción]. El alcance acordado sería [alcance concreto]."

Precio: "El desarrollo estándar cuesta $1,500 de pago único, más $50 al mes de hosting y soporte continuo. [Requisito especial] se cotiza aparte. El acuerdo incluirá las páginas, el alcance del soporte, los pagos y las etapas de entrega."

Confirmar: "¿Esto resuelve lo que quería mejorar? ¿Qué necesita para sentirse cómodo avanzando?"

Pedir la decisión: "Si el alcance escrito coincide con lo que hablamos, ¿le gustaría avanzar?"

Siguiente paso: "Le envío el alcance para que lo revise. Vemos cualquier pregunta el [fecha y hora]. Cuando estén completos el acuerdo y el pago inicial acordado, programamos la incorporación."

If the answer is yes

[ ] Confirm the legal business and signer, billing contact, and decision authority.

[ ] Send the founder-approved scope and agreement through the approved process.

[ ] Confirm a real review or onboarding appointment.

[ ] Log the agreement and payment status separately.

Do not invent a deposit percentage, refund promise, delivery date, cancellation policy, or unlimited edits. Use only terms confirmed by the founder and written in the agreement.

15 Close an AI agent project

Close a defined workflow. The buyer should understand the task, required tools, limits, handoff, usage, and test process. Get delivery confirmation before presenting the final scope and price.

English

Recommend: "I'd start with [one task] on [channel]. It would use [approved information/tools], produce [output], and hand [exceptions] to [person]. [Additional task] would be outside this initial scope."

Price before scoping: "Custom work starts at $2,000 setup and $300 a month. I need to confirm your tools and usage before giving you a final quote."

Price after approval: "For the scope we reviewed, setup is [approved amount] and the monthly service is [approved amount]. That includes [allowance/support]. [Extra usage or third-party fees] work like this: [written terms]."

Decision: "If the tests demonstrate [acceptance examples] and the written scope matches this, are you ready to move forward with the build?"

Next action: "Let's review the agreement and open requirements at [date/time]. We'll test together before going live."

Español

Recomendación: "Empezaría con [una tarea] por [canal]. Usaría [información/herramientas aprobadas], entregaría [resultado] y pasaría [excepciones] a [persona]. [Tarea adicional] quedaría fuera de este alcance inicial."

Antes de definir el alcance: "El trabajo a la medida empieza en $2,000 de configuración y $300 al mes. Necesito confirmar sus herramientas y el uso antes de darle una cotización final."

Después de aprobar la cotización: "Para el alcance que revisamos, la configuración cuesta [monto aprobado] y el servicio mensual [monto aprobado]. Incluye [uso/soporte]. [Uso adicional o cargos externos] se manejan así: [condiciones escritas]."

Decisión: "Si las pruebas demuestran [ejemplos de aceptación] y el alcance escrito coincide con esto, ¿está listo para avanzar con el desarrollo?"

Siguiente paso: "Revisamos el acuerdo y los requisitos pendientes el [fecha/hora]. Haremos pruebas juntos antes del lanzamiento."

If they want a smaller start

Offer one task or one channel only if the founder confirms the revised scope and price. A paid, limited pilot needs written success measures, duration, fees, and exit terms. Do not promise a free trial, guaranteed accuracy, instant deployment, or compatibility that has not been tested.

16 Website and price objections

First acknowledge the concern, ask what is behind it, answer that issue, and check whether it is resolved. Avoid reciting every benefit after a specific objection.

Too expensive

EN: "Is the concern the upfront amount, the monthly fee, or whether the project is worth it?" Then: "Let's compare the scope with the result you need. We can review a smaller scope or an approved payment option if available."

ES: "¿Le preocupa el pago inicial, la mensualidad o si el proyecto vale la inversión?" Después: "Comparemos el alcance con lo que necesita. Podemos revisar un alcance menor o una opción de pago aprobada, si está disponible."

Never discount during the call without approval. Reduce a deliverable only when the reduced offer is viable and documented.

I can use Wix or a cheaper builder

EN: "You can. Would you prefer to build and maintain it yourself, or have someone handle the agreed design, bilingual content, and setup? If the simpler option meets your needs, it may be the right choice."

ES: "Sí, puede hacerlo. ¿Prefiere construirlo y mantenerlo usted, o que alguien se encargue del diseño, contenido bilingüe y configuración acordados? Si la opción más sencilla resuelve lo que necesita, puede ser la adecuada."

I already have a website

EN: "What is working well with it? Is there anything you want it to do better?" If no unmet need: "It sounds like a rebuild may not be necessary right now."

ES: "¿Qué le funciona bien del sitio? ¿Hay algo que quisiera mejorar?" Si no hay necesidad: "Por lo que me cuenta, quizás no necesita rehacerlo ahora."

I got burned by an agency

EN: "What happened, and what would you need handled differently?" Then connect the answer to specific scope, review steps, milestones, and written terms. "I can show the work and how we'd review it together. I won't promise a revenue result I can't verify."

ES: "¿Qué pasó y qué necesita que esta vez se maneje distinto?" Relacione la respuesta con alcance, revisiones, etapas y condiciones escritas. "Le puedo mostrar el trabajo y cómo lo revisaríamos juntos. No le voy a prometer ingresos que no puedo comprobar."

Will this get me more leads

EN: "The site can make information and contact easier. The number of inquiries also depends on traffic, demand, and your offer. We can measure it, but this build doesn't guarantee leads."

ES: "El sitio puede facilitar la información y el contacto. Las consultas también dependen del tráfico, la demanda y su oferta. Podemos medirlo, pero este desarrollo no garantiza prospectos."

17 AI and decision objections

I do not trust AI

EN: "Which part concerns you most: wrong answers, customer experience, or access to your systems? We can test that situation and define when a person takes over. If it fails the agreed tests, we address that before launch."

ES: "¿Qué le preocupa más: respuestas incorrectas, la experiencia del cliente o el acceso a sus sistemas? Podemos probar ese caso y definir cuándo interviene una persona. Si no pasa las pruebas acordadas, lo resolvemos antes del lanzamiento."

My receptionist already handles it

EN: "What repetitive work would they most like help with? If the process is covered well, there may be no reason to add an agent."

ES: "¿Con qué tarea repetitiva le gustaría recibir ayuda a esa persona? Si el proceso ya funciona bien, quizás no hace falta agregar un agente."

We get enough work from referrals

EN: "That's useful to know. Is the priority handling existing inquiries better, saving administrative time, or neither right now?"

ES: "Gracias por decírmelo. ¿La prioridad sería atender mejor las consultas actuales, ahorrar tiempo administrativo o ninguna de las dos por ahora?"

Send me information

EN: "Happy to. Which would be most useful: a relevant example, the scope, or pricing? If it looks relevant, when would you like to review it?"

ES: "Con gusto. ¿Qué le serviría más: un ejemplo relevante, el alcance o los precios? Si le interesa, ¿cuándo le gustaría revisarlo?"

I need to think

EN: "Of course. What would you like to think through: fit, price, timing, or something else?" Address the answer, then agree on a decision date if they want one.

ES: "Claro. ¿Qué necesita revisar: si encaja, el precio, la fecha u otra cosa?" Resuelva ese punto y acuerde una fecha de decisión si el cliente desea continuar.

I need my partner to approve

EN: "What will matter most to them? Would it help to review the scope together with both of you?"

ES: "¿Qué será lo más importante para esa persona? ¿Le ayudaría que revisemos el alcance con ambos?"

Can you guarantee it works perfectly

EN: "I can't promise perfect answers in every situation. We define the task, test the agreed cases, and set a human fallback. Which situation would you want tested first?"

ES: "No puedo prometer respuestas perfectas en toda situación. Definimos la tarea, probamos los casos acordados y establecemos una alternativa humana. ¿Qué situación le gustaría probar primero?"

18 Proposal and recap template

Send this only after discovery. For an AI project, secure the founder's scope and price confirmation first. This recap supports the formal agreement; it does not replace it. Replace every bracketed field.

English

Subject: [Business] project scope and next step

Hi [Name],

You want to improve [specific problem] so that [desired outcome]. Based on our conversation, I recommend [Website Build / named AI task].

Scope: [exact pages/features OR task, channel, tools, output, languages, and handoff].

Not included: [relevant exclusions and separately quoted items].

Investment: [approved one-time fee] plus [approved monthly fee]. Monthly service covers [specific coverage]. [Included usage, extra usage, third-party costs, and other charges as applicable]. Payments begin according to [approved schedule].

From your team: [content, access, decision contact, and approvals].

Delivery and review: [approved milestones], dependent on [specific prerequisites]. We'll review [acceptance items] before launch.

Next step: [person] will [action] by [date]. We are scheduled to review the agreement on [date/time and timezone].

Does this reflect what you want to move forward with?

[Rep] | Azul | [contact details]

Español

Asunto: Alcance del proyecto de [Negocio] y siguiente paso

Hola [Nombre],

Quiere mejorar [problema concreto] para lograr [resultado deseado]. Por lo que hablamos, recomiendo [Sitio Web / tarea del agente].

Alcance: [páginas/funciones exactas O tarea, canal, herramientas, resultado, idiomas y atención humana].

No incluye: [exclusiones relevantes y elementos que se cotizan aparte].

Inversión: [pago único aprobado] más [mensualidad aprobada]. El servicio mensual cubre [cobertura concreta]. [Uso incluido, uso adicional, costos externos y otros cargos aplicables]. Los pagos comienzan según [calendario aprobado].

De su equipo: [contenido, accesos, contacto responsable y aprobaciones].

Entrega y revisión: [etapas aprobadas], sujetas a [requisitos concretos]. Revisaremos [criterios de aceptación] antes del lanzamiento.

Siguiente paso: [persona] hará [acción] para [fecha]. Revisamos el acuerdo el [fecha/hora y zona horaria].

¿Esto refleja el proyecto con el que desea avanzar?

[Rep] | Azul | [datos de contacto]

19 Follow up on active deals

Prefer a buyer-agreed date over an automatic schedule. The sequence below starts after a real conversation or proposal. Stop when the buyer declines or asks you to stop. If a partner or project dependency is the issue, follow that specific plan.

Same day recap

EN: "Thanks for today, [Name]. Your priority is [problem]. We discussed [scope and investment]. I'll [action] by [date], and you'll [action]. Our next review is [date/time]. Please correct anything I missed."

ES: "Gracias por su tiempo, [Nombre]. Su prioridad es [problema]. Hablamos de [alcance e inversión]. Yo haré [acción] para [fecha] y usted [acción]. Revisamos el siguiente paso el [fecha/hora]. Si algo no quedó correcto, dígamelo."

Day 2 or the agreed review date

EN: "What questions came up as you reviewed the scope? The main open point I have is [specific item]. Would [option A] or [option B] fit your process better?"

ES: "¿Qué preguntas le surgieron al revisar el alcance? El punto principal que tengo pendiente es [tema concreto]. ¿Le serviría más [opción A] o [opción B]?"

Day 5 with relevant evidence

EN: "You asked about [concern]. Here is [tested demonstration / relevant work / clarified scope] addressing that point. Does it resolve the concern, or is something still missing?"

ES: "Me preguntó sobre [inquietud]. Aquí tiene [demostración probada / trabajo relevante / alcance aclarado] sobre ese punto. ¿Resuelve la duda o falta algo?"

Day 10 close the loop

EN: "Should we move forward with the agreed scope, revisit on a specific date, or close this out for now? Any of those helps me keep the follow-up useful."

ES: "¿Prefiere avanzar con el alcance acordado, retomarlo en una fecha concreta o dejarlo por ahora? Así mantengo el seguimiento útil para usted."

Missed meeting

EN: "Hi [Name], we had a call at [time]. I can still meet at [time] or reschedule for [option]. If priorities changed, let me know."

ES: "Hola [Nombre], teníamos una llamada a las [hora]. Puedo atenderlo a las [hora] o reprogramarla para [opción]. Si cambió la prioridad, dígamelo."

Later reactivation

Contact only when appropriate to the buyer's preferences: "When we spoke, [issue] was on hold until [trigger]. Has that changed?" / "Cuando hablamos, [tema] quedó pendiente hasta [condición]. ¿Eso cambió?"

20 Manage the pipeline

Use one customer relationship management system or one shared lead log. A tool is optional; accurate notes and dated actions are essential. The same rep owns the record through delivery handoff.

Stages and evidence required

- **Researched:** business/contact verified, one observation recorded, initial offer chosen.
- **Contacted:** channel, date, message or call outcome recorded. No meaningful reply yet.
- **Connected:** buyer responded and a real problem is being explored.
- **Qualified:** problem, desired outcome, decision-maker, budget discussion, timing, and feasibility recorded. Discovery supports a project.
- **Demo completed:** relevant work demonstrated, buyer reaction and open requirements captured.
- **Proposal sent:** approved scope, price, recurring fees, dependencies, and review date delivered.
- **Decision pending:** buyer is reviewing a specific remaining issue by an agreed date.
- **Closed won:** signed agreement and agreed initial payment complete; onboarding owner and date assigned. Track verbal yes, signed, and payment pending separately until then.
- **Closed lost:** buyer declined or chose another option; reason captured. **Nurture:** a specific future trigger and suitable contact date recorded.

Required fields

Business; trade; city; website; decision-maker; contact details and source; preferred language; contact preferences; owner; offer; current process; observed or confirmed problem; volume or impact; desired outcome; budget; other stakeholders; timing; stage; last contact; next action; due date; scoped fee; monthly fee; usage terms; open requirements; proposal status; agreement status; payment status; outcome reason.

End every conversation with a clear plan

EN: "To confirm: I'll [action] by [date], you'll [action], and we'll reconnect on [date/time]. Is that right?"

ES: "Para confirmar: yo haré [acción] para [fecha], usted [acción] y volvemos a hablar el [fecha/hora]. ¿Correcto?"

Daily review

[ ] Handle replies, booked meetings, and overdue commitments first.

[ ] Every active opportunity has a next action, date, and responsible person.

[ ] Remove duplicate contacts and respect stop requests across all channels.

[ ] Move stale deals to a truthful status. A sent proposal is not a sale.

[ ] Update objections in the buyer's wording and capture the specific reason for loss.

21 Hand off a sold project

The rep briefs the founder or delivery owner before onboarding. Transfer exactly what was sold, what the client expects, unresolved items, and every promise. The client should know who owns delivery and when the next update will arrive.

Website handoff

[ ] Signed scope, payment status, page list, languages, approved custom features, and monthly support coverage.

[ ] Client decision-maker, content owner, delivery owner, milestones, and review appointments.

[ ] Domain and hosting arrangements; access through an approved secure process.

[ ] Logo, photos and permission to use them, services, service areas, contact details, and content approvals.

[ ] Forms and destination inboxes, tracking scope, and any separately approved integrations.

[ ] Acceptance checklist: mobile layout, navigation, both languages, links, contact paths, test submissions to approved destinations, and client review.

AI handoff

[ ] Signed task, channel, languages, tool actions, usage allowance, extra fees, support, and payment status.

[ ] Approved knowledge, required data, service rules, access owner, and test environment.

[ ] Human contact, handoff triggers, operating hours, tool-failure fallback, and launch approver.

[ ] Tests for normal requests, Spanish, unknown answers, human requests, and tool failure.

[ ] Customer-contact permissions and any calling or recording behavior confirmed before activation.

[ ] Reporting definitions, baseline, review date, and responsibility for ongoing changes.

Client introduction

EN: "Your project is now moving to [delivery owner], who will handle [responsibilities]. The agreed scope is [summary]. Our next step is [action] on [date]. Please send [items] through [approved method]. I'll stay available for questions about what we agreed."

ES: "Su proyecto pasa ahora a [responsable], quien se encargará de [responsabilidades]. El alcance acordado es [resumen]. El siguiente paso es [acción] el [fecha]. Envíe [elementos] por [método aprobado]. Sigo disponible para preguntas sobre lo que acordamos."

After launch

Schedule a review date agreed with the client. Check the delivered behavior and actual usage before discussing an additional service. Request permission to use a testimonial or project example. Results claims require a baseline, measurement period, and verified data; never turn a client's general compliment into a quantified claim.

22 First two weeks and coaching

Prepare before outreach

The founder confirms commercial terms on page 23. The rep practices the website and AI openings in both languages, tests the demos, sets up a lead log, and selects approved portfolio links. Start with 20 carefully researched roofing and HVAC businesses.

Suggested daily routine

For a full day, try 30 minutes for replies and follow-up; 45 minutes researching five new businesses; two 45-minute calling blocks; 30 minutes for personal emails and DMs; and remaining time for booked calls, proposals, and notes. For a shorter day, reduce new outreach before dropping commitments to active buyers.

Treat five researched businesses, ten manual call attempts, and five personalized written messages as **initial capacity targets to test**, not industry benchmarks or expected results. Count messages across channels; avoid sending every type to every company. Adjust after five working days using actual time and reply quality.

Track a few useful measures

- Calls attempted and conversations with the appropriate decision-maker. Conversation rate = decision-maker conversations / call attempts.
- Written messages delivered and meaningful replies. Reply rate = meaningful replies / delivered written messages. Exclude bounces and automated replies.
- Meetings booked and held. Attendance = held meetings / meetings scheduled to occur in the period.
- Qualified opportunities, proposals, and outcomes. Compare wins with proposals from the same cohort after enough time for decisions; do not divide this week's wins by unrelated new proposals.
- Signed value, initial cash collected, and monthly fees contracted. Keep these separate.
- Loss reasons, frequent objections, and overdue next actions.

Practice each day

Run a ten-minute role-play: skeptical roofer, busy HVAC owner, existing website, uncertain AI buyer, or partner approval. Score 0-2 for accurate opening, useful discovery, correct offer, truthful evidence, clear fees, and dated next step. Total possible: 12. This is a coaching tool, not a performance quota.

Review after two weeks

Which trade engaged? Which observed problem led to a useful call? Where did deals stop? Revise one opening or question at a time. Keep actual phrasing that earns clear answers. Expand to other industries only with relevant examples and a delivery process the founder can support.

23 Commercial settings and source notes

Founder settings before a final agreement

The rep can use the confirmed starting prices and discovery scripts immediately. Final commitments require the approved terms below. Record answers in the offer sheet so the rep uses them consistently.

- **Website boundaries:** exact standard page count and features, content/translation responsibility, revisions, support coverage, domain/hosting ownership, and what happens when service ends.
- **AI boundaries:** available task/channel, supported integrations, included volume, usage rates, third-party charges, support, maintenance, and limits on changes.
- **Payment:** deposit or initial payment amount, milestones, monthly billing start, tax or other charges, accepted payment method, and authorized payment link.
- **Delivery:** milestones, access/content dependencies, review windows, launch criteria, and a process for changes outside scope.
- **Commercial terms:** cancellation, refunds, contract duration, ownership, and who can approve exceptions or discounts.
- **Combined work:** list setup and recurring fees for each service. A website plus the lowest AI starting rates adds to $3,500 setup and $350/month before any separately quoted work or usage. This arithmetic is not an approved bundle offer.
- **Outreach readiness:** current business contact information and mailing address, approved account profiles, stop-request log, tested portfolio/demo links, and the current booking link.

Evidence the rep can use

Use the work linked at https://azulwebdev.com/work for visible website examples. The source lists Aspire Roofing Services, Hello You Wellness Center, Caley Insurance, Sanos Medical Group, and the founder's portfolio. Confirm that each example is current and approved for sales use. Describe only work and relationships the founder can substantiate. Do not label a project a paid client or attribute business results based only on older site copy.

For AI, use a tested working example labeled as a demonstration. The prospect's own process and agreed acceptance cases should drive the proposal. Sample dashboard figures, fictional transcripts, and illustrative scenarios are not client outcomes.

Basis for this playbook

User confirmations: websites and AI agents are priorities; South Florida home services are the main target; outreach is cold calls, DMs, and email; one rep handles the deal; customer-facing scripts are English and Spanish; current sales evidence is limited.

Repository references reviewed: src/data/services.js and src/data/content.js for website scope/pricing; src/data/translations.js for custom-agent starting rates and tier descriptions; src/data/leadAgent.js for pilot status; src/data/workProjects.js for portfolio examples. Older business-plan and handover prices were not adopted. The rep should refresh the offer sheet whenever the founder changes an offer.
